

TOLL-FREE BUCKETS SWITCH AND SAVE!

Don't have a toll-free number? A toll-free number makes your business more accessible to customers regardless of their location. Adding a toll-free number can give a business a more professional image and more credibility. It can help improve customer satisfaction, as customers are more likely to call or text a business if they know they can do so without incurring any additional cost.

NEC'S UNIVERGE BLUE CONNECT'S TOLL FREE NUMBER BENEFITS

- **Shared minutes maximize your usage** – Multiple toll-free numbers can share the same bucket of minutes. Just pick the bucket of minutes you think your business will need.
- **Flat rate pricing for all minutes means a more predictable bill** – In-bucket minutes for calls to/from US and Canada (including Alaska and Hawaii) AND any overage minutes are the same consistent rate.
- **Your bucket of minutes will last longer** – After the first 18 seconds, calls are metered at 6-second increments instead of rounding up to a full minute of usage, making your buckets last longer.
- **One consolidated bill for all your UNIVERGE BLUE communications solutions** – consolidating your communications solutions and bills creates efficiencies and will save time and money.

WE MAKE IT EASY TO ADD OR MOVE YOUR TOLL-FREE NUMBERS TO UNIVERGE BLUE CONNECT!
